

The TASI Group completes the acquisition of Sepha Ltd.

The Addition of Sepha Ltd. Expands on The TASI Group's Leading Global Position as a Supplier of Inspection & Measurement Technology

Harrison, Ohio, June 20, 2013

The TASI Group is pleased to announce the acquisition of Sepha Ltd., a leading manufacturer of specialized equipment used in the manufacture of pharmaceutical blister packs, medical device and healthcare products. Sepha products enable customers to create high quality blister packs, to accurately detect leaks and weak seals in packaging, and to recover high value products from blister packs. Sepha is located in Belfast, North Ireland, serving a global customer base in Europe, Middle East & Africa, Asia and the Americas.

With this acquisition, the TASI Group complements our global position as the largest provider of advanced leak test inspection solutions worldwide. Sepha joins TASI's other three Leak Test Inspection companies; ALPS (Air Logic Power Systems, LLC), Bonfiglioli Engineering, and Cincinnati Test Systems, in a Test, Inspection & Measurement Product Platform that serves a broad range of markets including Automotive, Life Science, Pharmaceuticals, General Industry, Energy, Plastic & Metal Containers and Food & Beverage.

Sepha was founded in 1980, Bonfiglioli Engineering in Ferrara, Italy was founded in 1974, the same year that ALPS was founded in Milwaukee, Wisconsin, USA. Cincinnati Test Systems was later founded in 1981 in Ohio, USA. The combined technology, application engineering experience and innovative equipment solutions that these companies bring to the customer are unmatched throughout the world.
